December 5, 2017

Dear Community Members of Walworth Jt. School District #1,

As you may or may not be aware, our school district has been performing very well for the past two years! Recently, our Wisconsin State Report card was released with a score of 78.5 putting us in the Exceeds Expectations range for the state and placing us ahead of many nearby districts! Our continued pursuit of our mission "Providing the Best Education for All" is truly a driver of success for our students, staff, and families.

As we continue to pursue our mission, we are challenged by the funding mechanisms provided by the state and federal governments and the financial impact brought on by some students open enrolling out of our district.

As we pursue educational best practice to provide the "Best Education for All" and adjust to these funding challenges, it is apparent that we need to make changes to our instructional plan and staffing assignments for the 2018-2019 school year. This letter, the accompanying Frequently Asked Questions (FAQ) handout (other side of sheet), and the invitation to attend 1 of 2 public information sessions are provided to keep our families and our community up to date on the upcoming changes. Please let us know if you have any questions or would like further information on the changes that will be implemented in 2017-2018. Thank you for your continued support!

Sincerely,

Dr. Mary Ann Kahl
District Administrator
